b) In case of the "Market execution" trading tool type, a quote for opening an order may differ from the requested one.

c) The note about the open order appearing on log-file of the server declares that the Client's request has been processed and the order has been opened. Each open order on the trading platform receives a ticker.

d) An order to open a position submitted for processing before first quote appears on the trading platform at market opening, will be declined. In this event in the client terminal window a message will appear "No quote/trading is forbidden".
